

Toolbox for Effectmakers Quick guides

Effectmakers has written several Quick guides to help our BMS users to better understand and use the variety of possibilities the BMS system offers.

All Quick guides are available for download in .pdf format from www.effectmakers.com/support

In case you would like to incorporate the guides in your own company material e.g. add company specific guidelines, you may do so. No approval from our site is needed.

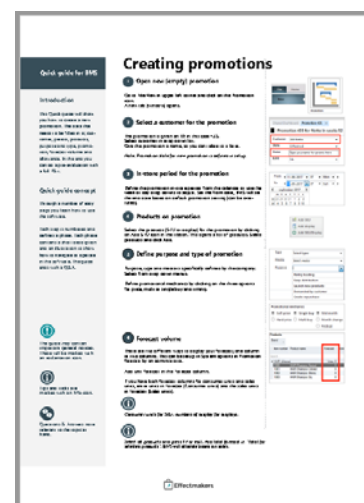

All original files are done in Microsoft Publisher 2016 (.pub) format and can be downloaded in one .zip file from the support section of our website.

We do not offer other formats than .pub files and .pdf files.

The publisher files all follow the same A4 lay-out with step by step description in the middle, short introduction and tips and tricks to the left and screenshots to the right for easy navigation.

If you are not familiar working in publisher, we recommend making screenshots of the relevant sections, insert in a word document and add your own comments.

If you have questions, regarding content or ideas for new Quick guides please contact support@effectmakers.com.

Regards,

Dennis Lynge Nielsen
